of Scale

foreword

In order to better provide asset management services to users, Scale Corporation in the United States has developed the Scale Technology Quantitative System, which integrates advanced algorithms and artificial intelligence technology to provide investors with a powerful tool to respond to market fluctuations and uncertainties in a scientific and systematic manner. The Scale system can analyze market data in real-time, automatically execute trading strategies, help investors capture investment opportunities, reduce risks, and improve investment efficiency.

By quantifying AI trading plans in the system, help customers easily profit.

Flexible storage, withdrawal, and consumption of customer digital assets.

Enable more users to invest in digital assets with low barriers to entry.

The vision of Scale is to create an efficient investment service platform that is not affected by human factors and is fully intelligent, allowing users to make efficient and scientific investments while fully controlling their personal assets independently. And through the underlying technology of Scale, achieve a global digital financial interconnection network, realizing financial freedom and internet freedom.

Scale Origin of the company

Company Profile

Scale headquarters was founded in 2016, and the independent planning department for quantitative systems was established in 2019. It is located in Texas, USA and has been at the forefront of financial technology innovation. As a global crypto finance quantitative services company, we focus on providing cutting-edge technical support and quantitative trading solutions for global investors.

Our team is composed of a group of passionate experts in the financial market who have developed a quantitative trading system that can capture market dynamics in real-time and execute efficient trading strategies using cutting-edge artificial intelligence technology and big data analysis. The Scale technology quantification system provides users with a safe and reliable investment platform through its high-precision, high-speed, and highly stable operation, making complex investment decisions simple and efficient.

The mission of Scale Company is to help clients navigate the complex and ever-changing financial market with stability through precise market analysis and efficient trading strategies. Our service network covers the world and is committed to providing investors with a safe, convenient, and efficient investment platform, opening a new chapter in wealth growth. Scale Company, your reliable partner in the financial market.

development history

Scale Quantitative Trading System

In 2019: Led by Mr. Cyle Anthony, the R&D team collaborates with senior management at headquarters to develop intelligent cryptocurrency trading products! Specially used in the field of cryptocurrency. Established an independent strategic planning department and launched the Scale quantitative trading system for global distribution, covering a global scale.

In 2021: The cryptocurrency intelligent trading product developed by Scale has gained market recognition.

In 2022: Scale has established branches in the United States, Canada, Singapore, the United Kingdom, and other places.

In 2023: After a long period of market research and continuous technological innovation, Scale will enter the South Asian market in 2023.

In 2024: Scale has officially obtained capital verification approval from regions such as South Asia, the Middle East, and Asia, pioneering the development of blockchain in the Asian market. At the same time, it has obtained authorization to establish a branch office in Pakistan, South Asia.

In 2025: Scale Technology will expand into more fields in the next 5 years, including education, charity, health, lifestyle, renewable energy, and strive to become a globally influential brand.

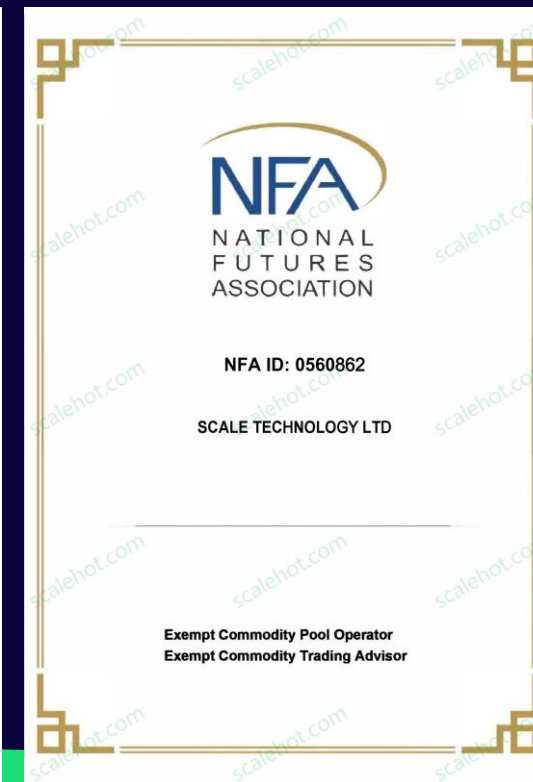

Scale Introduction to Technology Quantitative System

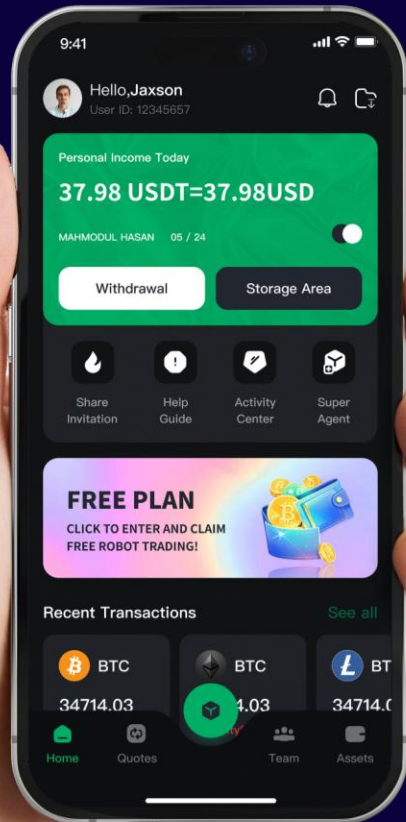

Introduction to Scale Technology Quantitative System

Scale's innovative trading system captures profit opportunities for users through precise market analysis and automated trading strategies. Users do not need to have complex financial knowledge or trading experience. They only need to join the Scale platform to utilize its advanced quantitative trading system for investment and achieve wealth growth. Scale not only holds a US license and financial license, but also has physical operating offices, which provides a solid guarantee for the legality and security of its business.

Wealth dilemma

The two pursuits of life: freedom and wealth, are the core goals of most people's lives.

Freedom means the ability to choose one's own lifestyle and pursue personal dreams and value realization without external constraints.

Wealth provides the material foundation for this freedom. It is not just a number in a bank account, but also the ability to fulfill personal wishes, ensure family happiness, and contribute to society.

Wealth dilemma

Why do we need to make money? Making money is a means to achieve personal freedom and dreams. It can provide us with guarantees in various aspects of life such as education, health, and travel, while also serving as a tool for us to help others and influence the world. However, for many ordinary people, making money is not an easy task and they face multiple obstacles on the path of pursuing wealth.

Lack of opportunities

Due to limitations in education and information access, certain regions or social classes have difficulty accessing opportunities to improve their financial situation

Lack of funds

Even if there is a willingness to invest, insufficient funds can severely limit an individual's investment ability

Lack of experience

Lack of sufficient experience makes it difficult for people to identify investment opportunities and avoid risks

Insufficient resources

Unequal distribution of resources prevents many people from accessing sufficient resources to accumulate wealth due to factors such as background or geography

Investment failure

Due to market volatility and uncertainty, even experienced investors may face the risk of investment failure

Institutional failure

High taxes, inflation, and economic instability all weaken an individual's ability to accumulate wealth

Digital currency wealth opportunities

Since the birth of digital currencies, their convenience and flexibility have attracted attention in circulation and payment. Despite speculative behavior, countries' attitudes towards blockchain assets have gradually shifted from prohibition to recognition and legislative support, indicating that this field will be the future trend of development. Digital assets and blockchain technology have become necessary innovations in the financial industry, and the rapid growth of market size will continue for decades. Computing power, as an important means of acquiring digital currency, is gradually occupying a central position

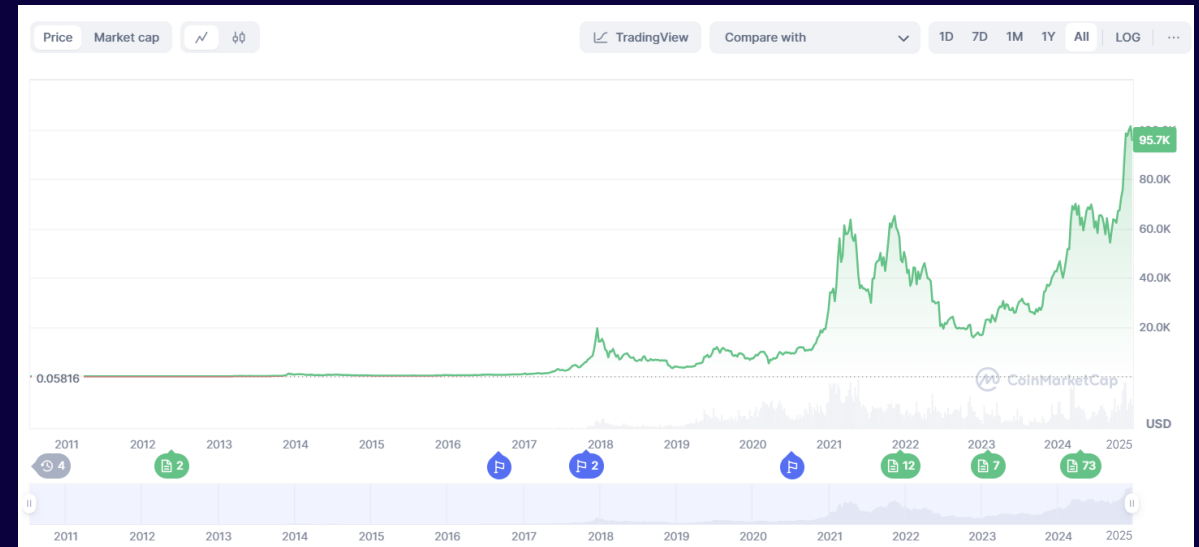

Based on the trends and waves of blockchain and digital currencies, various types of cryptocurrencies have continued to heat up since the beginning of 2017. Although the market has entered a period of decline thereafter, this is also the norm for any investment product. There will be both a decline and an increase, but we should all see this trend: all human assets will eventually be digitized, and the process of asset digitization is inevitable and irreversible. Blockchain has greatly improved the speed of this transformation.

Digital currency wealth opportunities

Currently, various industries are accelerating digitalization, and blockchain is seen as a major opportunity for the next decade. Despite experiencing a low point in 2018, Bitcoin quickly resumed its upward trend and remained at a high price. On December 5, 2024, the price of Bitcoin surpassed \$100,000, setting a new historical high. This indicates that asset digitization has become a widespread consensus.

Compared to traditional financial markets, the digital currency market is almost open to everyone, breaking down geographical and social class limitations and giving everyone the opportunity to participate in global wealth distribution.

Scale technology quantification system advantages

excellent performance

The Scale intelligent trading system utilizes advanced algorithms and sensor technology to achieve high-precision, high-speed, and high stability trading, quickly responding to market changes, ensuring accurate and reliable operations, and reducing errors and delays.

high flexibility

The Scale system adapts to the ever-changing market environment and investment needs, and can quickly transform its working mode to meet the needs of different industries and fields

Strong autonomy

The Scale system is equipped with advanced artificial intelligence, capable of self-learning and decision-making, and can independently analyze market data and automatically adjust trading strategies, reducing the burden of investor management and improving trading efficiency.

Good security

The Scale system has a comprehensive security mechanism that ensures stable transactions and protects user assets through encryption technology and risk control.

Scale Technology Quantitative System Profit Model

The Scale system, through advanced algorithms and real-time data analysis, can quickly identify and utilize these price differences, providing users with an automated arbitrage platform. By comparing real-time quotes from different exchanges, the Scale system can discover and execute low buy high sell trading strategies.

Users do not need to constantly monitor market trends or possess strong market analysis skills. The Scale system can monitor the market 24/7 and automatically execute trading strategies, greatly saving users' time and energy.

Due to the dependence of arbitrage trading on price differences between different exchanges, which are usually not affected by fluctuations in a single market, the risk of arbitrage trading is lower compared to direct investment in digital currencies.

Scale

Application of technology quantification system

Scale Technology Quantitative System AI Program

Scale's intelligent trading system relies on advanced artificial intelligence technology to provide users with different levels of trading plans.

The operation process of the system has also been carefully designed to ensure that users can easily get started. Users only need to activate the selected AI trading plan, and the system will automatically execute the transaction according to the preset strategy.

The start-up fee for the Scale AI program will be refunded to users after 30 days, which means that users only need to pay the purchase fee for the AI program to experience the system's performance and stable profitability

SCALE AI PLAN PRICE BENEFIT

AI Plan Type	Free plan	Plan 1	Plan 2	Plan 3	Plan 4	Plan 5	Plan 6
AI Plan Price	\$0	\$2	\$5	\$20	\$60	\$200	\$600
AI Plan Activation Fee	\$0	\$20	\$80	\$300	\$1000	\$3000	\$10000
Total Investment Amount	\$0	\$22	\$85	\$320	\$1060	\$3200	\$10600
Daily Income	\$0.11-0.15	\$0.27-0.31	\$1.02-1.19	\$3.95-4.7	\$13.1-15.9	\$40.5-50.2	\$134.3-169.6

AI PLAN 4

- Plan 4 purchase price: **60 USDT**
- Plan 4 startup price: **1000 USDT**
(This amount is a deposit, and the fees will be refunded to your account balance at the end of the AI program.)
- Total investment amount: **1060 USDT**
- Validity time: **30 Days**
- Daily income: **13.1-15.9 USDT**
- 30-Day Income: **(13.1-15.9 USDT)*30 = 393~477 USDT**

Summary

The total investment amount is **1060 USDT**

The total balance of your account after the AI plan is completed = AI plan activation fee + 30 days of earnings
1000 USDT + (393~477 USDT) = 1393~1477 USDT

The benefits of joining the Scale technology quantification system

TEAM COMMISSION INCOME RATIO

Agent Level	Get The Commission Ratio(%)	Next Level Daily Earnings	Agent Gets Commission
Lever 1	12%	100 USDT	12 USDT
Lever 2	5%	100 USDT	5 USDT
Lever 3	3%	100 USDT	3 USDT

Example

A invites B, B invites C, C invites D

A gets B's proxy percentage **12%**

A gets C's proxy percentage **5%**

A gets D's proxy percentage **3%**

B, C, D robot daily income is 100 USDT

A gets B's commission income **100*12%=12 USDT**

A gets C's commission income **100*5%=5 USDT**

A gets D's commission income **100*3%=3 USDT**

Note

The commission income earned by the upper-level agents is unrelated to the earnings of the lower-level individuals and will not affect the personal earnings of each subordinate. All agents' commission income is provided as a commission reward by Scale Company!

AI PLAN REWARD

Direct subordinates start the AI plan for the first time and meet the event rules to receive corresponding AI plan rewards.

For Example

A invites B
B launch AI Plan for the first time (20 USDT)
A will receive an AI plan

Start AI plan	Reward superiors
Plan 1	Plan 1/1
Plan 2	Plan 2/1
Plan 3	Plan 2/2
Plan 4	Plan 3/1
Plan 5	Plan 3/2
Plan 6	Plan 4/2

🏆 PURCHASE AI PLAN AND RECEIVE CASHBACK REWARDS

When a direct subordinate recharges to purchase the AI plan for the first time, the superior will receive a cashback of 20% of the AI plan price, which will be directly returned to the superior's account wallet balance.

For Example

A invites B, and B spends 20 USDT on his first recharge to purchase the AI plan, and A can get a cashback of **20*20%=4USDT**.

Note This activity is only for direct subordinates who recharge to purchase the AI plan for the first time. If C recharges for the first time to purchase the AI plan, only B can get the cashback reward, and A cannot get the reward.

Team commission rebate mechanism

A major feature of the Scale platform is its team rebate mechanism. Users can earn stable percentage rebates by establishing their own teams and inviting family and friends to join.

Reward AI Program

The reward AI program provided by the Scale platform is another advantage that attracts users. By participating in this program, users can receive corresponding rewards based on their investment amount and trading activity.

Purchase AI plan cashback rewards

When a direct subordinate makes their first recharge to purchase an AI plan, the superior can receive a 20% cashback, which reduces the user's investment cost and increases the attractiveness of the investment.

Excellent agent monthly salary

This monthly salary system not only affirms the efforts and contributions of agents, but also provides stable income security for them.

Scale User Support

Technical support

Through professional technical support, users can obtain in-depth market analysis, risk assessment, and trading strategy recommendations.

Automated Trading

The automatic trading function of the Scale platform is one of its core advantages. Intelligent trading systems can automatically negotiate and execute transactions, greatly reducing users' operational burden and emotional interference.

Ecological community

The ecological community gathers quantitative traders, developers, analysts, and other relevant individuals to share experiences, discuss strategies, and drive the development of the community.

Win win situation for the team

Users can establish their own teams and receive rebates from the trading activities of team members. This model encourages users to cooperate with each other, share resources, and achieve common growth of the team.

Scale Future Development

Scale's Future Vision and Planning

01

Ensure product quality quality and reliability

The company ensures stable operation of its products under various market conditions through continuous testing and improvement, providing users with a trustworthy trading platform.

02

Establish transparency and Honest communication channels

The company believes that through open and honest dialogue, we can better understand user needs and provide services that better meet market and user expectations.

03

Continuously innovating and Develop new products and technologies

Scale promises to continuously invest in the research and development of new products and technologies to maintain its leading position in the fintech field.

04

Actively participate in social responsibility Initiatives for Sustainable Development

Scale recognizes the role of businesses in social responsibility and sustainable development, and actively participates in relevant initiatives.

Scale's Future Vision and Planning

Establish a good partnership

Scale is committed to establishing solid partnerships with all parties involved. By collaborating with leading companies and institutions in the industry, Scale can provide users with a wider range of services and higher quality resources.

Provide high-quality customer service and technical support

Scale values providing customers with high-quality customer service and technical support. The company ensures timely and effective resolution of any issues encountered by users during use through a professional service team.

Building a good cryptocurrency trading ecosystem

The goal of Scale is to create a healthy and transparent cryptocurrency trading ecosystem. By integrating industry resources and providing innovative tools and services, Scale aims to promote fair trading and healthy development in the cryptocurrency market.

Scale company welfare activities

Regular proxy dinners

Gathering is not only a platform for sharing experiences and discussing strategies, but also an opportunity to enjoy life together, establish deep friendships, and strengthen team cohesion.

Yacht Party

The event not only provides a high-end social setting for agents, but also a reward for their hard work and enhances the team's sense of belonging.

Five star hotel lottery

Scale will hold a lottery event for five-star hotels, giving participants the opportunity to experience high-end hotel services.

10 day tour in Europe

The company provides excellent agents with the opportunity to explore Europe and its rich history and culture.

Scale company welfare activities

Exclusive prizes for advanced agents

Scale has prepared exclusive prizes for senior agents to recognize their outstanding contributions to the company.

Charitable donation

The company advocates social responsibility and will organize charitable donation activities to convey warmth and care.

sport sponsorship

Scale supports the sports industry by establishing connections with the community through sports sponsorship activities.

2026 World Cup tickets

The company will provide agents with tickets for the 2026 World Cup, allowing them to experience this football event.
